UNICEF 2014-2017 STRATEGIC PLAN
Realizing the rights of every child, especially the most disadvantaged

UNICEF will promote the rights of every child, everywhere, in everything the organization does.

The equity strategy, emphasizing the most disadvantaged and excluded children and families, translates this commitment to children's rights into action.
1. Children with disabilities are counted and have greater visibility in national data collection.

2. Children with disabilities are safe from stigma, discrimination and other forms of violence.

3. Children with and without disabilities are learning and playing together in regular schools.

4. Girls with disabilities have greater access and opportunities to realize their potential.

5. Concrete action by governments to ratify and progressively implement the CRC & CRPD.

6. Funding for humanitarian action take into account the needs of children and adults with disabilities and remove barriers instead of building new ones.
Regional Hubs
GOING FORWARD
IN SUPPORT OF UNICEF 2014-2017 STRATEGIC PLAN

• Consolidate *technical expertise* at HQs

• *Enhance capacities* on the ground

• Each regional office to have *specialization on a key disability thematic area* and to develop best practices for global replication

• Create a *regional disability specialist* role in each regional hub

• *Strengthen capacity and interventions* to support countries facing crisis and humanitarian emergencies

• Adequate *funding* allocation
Much more needs to be done

The results we wish to achieve will not be a reality without counting on the support and reinforced commitment of our donors, partners and stakeholders – and in particular children with disabilities, their families and organizations.
